

Your strong partner

Effortless transportation even with extremely heavy loads

CargoMaster C400

For the transportation of extremely heavy loads most often several persons are needed. This type of work particularly strains a person's back and joints. Therefore, rather often, there is a shortage of personnel due to back problems and joint injuries.

The transportation of even extremely heavy goods with the CargoMaster does not damage neither the stairs nor the goods.

The CargoMaster renders it possible for one person alone to transport loads up to 400 kg, which makes the device your ideal partner. Whether the loads have to be transported up and down stairs or on level ground does not make any difference. Even the loading and unloading of vehicles or shelves is easily possible with the CargoMaster, thanks to its integrated lift.

The center of gravity can be optimally adjusted to the load to be transported due to the lowering and rising of the electrically adjustable toe plate. This facilitates transportation on stairs as well as on level ground enormously.

The C400's climbing mechanism provides safe transportation on virtually any type of stairs inside as well as outside. The safety brakes automatically brake at each step's edge.

The CargoMaster's tyres are puncture-proof, even though they are under constant stress.

Electricity is provided by the battery pack that can be charged by a charger plugged into a wall outlet. One battery charge is sufficient for 120 – 225 steps, depending on the load.

Since the toe plate can be moved up and down, the center of gravity can be adjusted optimally, which makes the transportation of heavy loads on level ground a breeze.

Loading and unloading of vehicles is facilitated tremendously by the integrated lift.

- safe transportation of heavy goods up and down stairs up to 400 kg
- continuously adjustable climbing speed
- no damage of goods or stairs
- electrical adjustment of the toe plate to adjust to the center of gravity
- integrated lift to facilitate loading and unloading
- puncture-proof tyres
- considerable relief for the personnel

CargoMaster C400

Accessories of the CargoMaster C400

Foldable grips

Rack for the toe plate

Stairs for heavy lifting

Mega battery pack

Charging cable for the car

Technical data

Maximum loading capacity	400 kg
Climbing speed	3 - 8 steps per minute (continually adjustable)
Batteries	2 x 12 V / 5.0 Ah
Capacity of batteries	120 - 225 steps (depending on the load)
Max. lifting toe plate	700 mm
Max. lowering toe plate	210 mm
Weight of the device	74 kg
Weight of the battery pack	4 kg
Total weight	78 kg

The CargoMaster C400 corresponds to the relevant guidelines for machinery 2005/A2/EG, appendix 1, of the European Union.

The delivery package contains the stair climber C400 plus batteries, charger and lashing strap.
